Irving Sylva III

Full Stack Web Developer | Software Engineer

Weed, CA | 530.471.8089 | irvingcsylva@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

TECHNICAL SKILLS

Front End: JavaScript (ES6+), HTML5, CSS3, React, Jest, Yup, Axios, Bootstrap
Back End: Node.js, Express, MySQL
Databases: MySQL, MongoDB
Tooling: Git, Bash, VS Code, Vercel
Additional: Debugging, Deployment, Lua

PROJECTS

Exovara Labs, *Full Stack Developer* - React | Node | Javascript | Vercel   [Webpage](#) | [Github](#)
- Developed a full-stack web application with Discord integration, implementing real-time image fetching and display functionality improving performance by 60%
- Engineered a responsive frontend using React and Bootstrap, creating reusable components and implementing modern UI/UX practices
- Engineered a RESTful API backend with Node.js, handling Discord bot integration and image processing
- Implemented secure environment variable management and API endpoint validation for enhanced security
- Deployed the application using Vercel, ensuring optimal performance and scalability

Portfolio, *Full Stack Developer* - React | Node | Javascript | Vercel   [Webpage](#) | [GitHub](#)
- Designed and developed a modern, interactive portfolio website using React, featuring a unique Matrix-style background animation, a comprehensive project gallery, and a seamless user experience across all devices.
- Implemented a robust contact form with real-time validation, animated feedback, and EmailJS integration, ensuring efficient communication with users and showcasing expertise in frontend development.
- Utilized a range of technologies, including React.js, EmailJS, and custom CSS animations, to create a fully responsive and engaging website that effectively showcases skills, projects, and achievements, demonstrating proficiency in full-stack development and UI/UX design

Star Wars Characters List, *Full Stack Developer* - React | Node   [Webpage](#) | [GitHub](#)
- Implemented a webpage that shows a list of Star Wars characters and their relative info
- Developed card components, combining data from different sources into a single data structure
- Engineered code that Renders repeatable components to the DOM using React
- Deployed the application using Vercel, ensuring optimal performance and scalability

EXPERIENCE

Freelance Developer, *Remote* - *Gameserver Developer*   2023 - Present
- Developed and managed a custom GTA V game server, enhancing player engagement and community interaction by growing the Discord server to 250+ members through targeted marketing strategies.
- Engineered Lua code to address member feedback and improve gameplay, improving gameplay by 50%
- Managed the server's database using phpMyAdmin and MySQL, ensuring seamless data handling and user management improving data response tick by 30%

Kampgrounds of America, *Mt. Shasta, CA - Maintenance Supervisor* 2022 - Present
- Led property maintenance operations, ensuring high standards of cleanliness and functionality across facilities, including pools and maintenance equipment.
- Supervised maintenance staff, facilitating efficient completion of work orders and seasonal tasks, which improved operational workflow by 20%.
- Streamlined daily office functions, including cash management and till closing for the camp store, ensuring accurate financial reporting.
- Implemented quarterly maintenance schedules, enhancing property appearance and guest satisfaction.

EDUCATION

BloomTech *Student of the Full Stack Web Development Program* 03/2024 - Present
